

ScanX DVM

D I G I T A L I M A G I N G S Y S T E M

Digital Imaging for the veterinary dentist without the limitations of corded sensors.

- All intraoral sizes from No. 0 through No. 4 Occlusal.
- Designed to load and operate in normal room lighting.
- Incomparable ease-of-use. Just expose, insert and view.
- Diagnostic quality, detail-rich images are available in seconds.

ScanX DVM

Superior PSP Technology

Reusable Phosphor Storage Plates (PSP) are used for imaging. Correct PSP exposure is achieved using up to 80% less radiation than for D-Speed film. With proper handling, PSPs may be reused thousands of times.

Speed Reading

The ScanX DVM has a patent-pending continuous rapid feed system; there are no drums or holders to load or change. All PSP sizes are inserted directly into the ScanX DVM. The first image is available in only 17 seconds; subsequent images in as little as 4 seconds.

Detail-Rich Diagnostic Quality

The resolution of ScanX DVM is impressive. Standard resolution yields radiographic images of outstanding diagnostic quality.

Versatility No Sensor System Can Match

Corded sensors limit you to one or two small sizes and require many individual exposures. ScanX DVM plates come in all intra-oral sizes. You'll not only take fewer X-rays, your patient will be out of anesthesia that much sooner.

Use Less

X-ray film, duplicators, as well as film processor and chemistry are no longer needed. Eliminate costly chemistry disposal and water consumption. You won't even need a darkroom because ScanX DVM functions in normal room lighting.

Get Started

All that's required for digital imaging is the ScanX DVM, a computer and certified practice management software. Use your existing x-ray equipment; just replace film with a PSP.

Specifications

Dimensions (WxDXH):	15" x 15" x 15.5"
Weight:	43 lbs.
Electrical:	100-240 VAC
Laser Classification:	Class I Laser Product, Compliance with FDA HHS 21 CFR 1040.10 and IEC 60825-1
Imaging Media:	Size 0, 1, 2, 3 and 4 PSPs
System Includes:	Power Supply and Cord Computer Connector Cord

Computer System Requirements/Recommendations

CPU Speed:	2 GHz Pentium III
Operating System:	Refer to software manufacturer
RAM:	512 MB
Hard Drive:	40 GB
CD ROM Drive:	48X
Monitor:	SVGA 17" (1024x768 Resolution) Contrast ratio 450:1; .22 dot pitch capability; for optimum viewing a CRT is recommended
Video Display Adapter:	32 MB RAM
Keyboard/Mouse:	Standard
Backup Device:	Recommended for daily saving
External Surge Protector:	Recommended
Printer:	Optional
USB Port:	Must be USB 1.1 or higher
